**RICHARDS PACKAGING INCOME FUND**

**Richards Packaging Income Fund Announces 2007 Second Quarter Results**

August 10, 2007, (TORONTO) -- Richards Packaging Income Fund (TSX: RPI.UN) (the "Fund") announced today results for the quarter ended June 30, 2007. The Fund owns 95% of Richards Packaging Inc. ("Richards Packaging"), the leading packaging distributor in Canada, and third largest in North America.

"The Fund delivered another solid quarter with second quarter revenue growth of 0.4% over the same period in 2006. Gross profit as a percentage of sales and EBITDA<sup>1</sup> as a percentage of sales continued to run at strong levels of 16.7% and 10.9% respectively. Net income was \$3.9 million, up \$0.3 million, or 2.9¢ per Unit, for the second quarter" commented Gerry Glynn, Chief Executive Officer.

"The Fund paid monthly distributions of 9.35¢ per Unit for January through June, which represents an annualized yield of 11.8% on a \$9.50 price per Unit. The payout ratio<sup>3</sup> for the second quarter was 97% and for the first half of 2007 was 98%. The increase from the 2006 first half payout ratio of 92% reflects higher tax leakage in Richards US, which should largely reverse during the second half of 2007. As a result, the payout ratio is expected to decrease for the remainder of 2007<sup>4</sup>," added Mr. Glynn.

Details of the Fund's results are currently available on Richards Packaging's website at [www.richardspackaging.com](http://www.richardspackaging.com) and on August 11, 2007 on SEDAR at [www.sedar.com](http://www.sedar.com).

About Richards Packaging

Richards Packaging is a full-service packaging distributor targeting small- and medium-sized North American businesses. Richards Packaging has operated for over 90 years and currently serves over 7,000 regional food, wine and spirits, cosmetic, specialty chemical, pharmaceutical and other companies from 17 locations throughout North America.

<sup>1</sup> Management defines EBITDA as earnings before amortization, interest, unrealized gain / loss on financial instruments and taxes. EBITDA is the same as income before under noted items, income taxes and non-controlling interests as outlined in the interim consolidated financial statements. Management believes that in addition to net income, EBITDA is a useful supplemental measure for investors of earnings available for distribution prior to debt service, capital

expenditures and taxes. Management uses this measure as a starting point in the determination of earnings available for distribution to unitholders and exchangeable shareholders. In addition, EBITDA is intended to provide additional information on the Fund's operating performance. This earnings measure should not be construed as an alternative to net income or as an alternative to cash flow from operating, investing and financing activities as a measure of the Fund's liquidity and cash flows. EBITDA does not have a standardized meaning prescribed by GAAP and therefore the Fund's method of calculating EBITDA may not be comparable to similar measures presented by other companies or income trusts.

- 2 Management defines distributable cash flow, in accordance with the Richards Packaging's credit agreement, as EBITDA less interest, cash income tax expense, maintenance capital expenditures and loan payments. The objective of presenting this measure is to calculate the amount which is available for distribution to unitholders and exchangeable shareholders. Investors are cautioned that distributable cash flow should not be construed as an alternative to cash flow from operating, investing and financing activities as a measure of the Fund's liquidity and cash flows. Distributable cash flow does not have a standardized meaning prescribed by GAAP and therefore the Fund's method of calculating distributable cash flow may not be comparable to similar measures presented by other income trusts.
- 3 Management defines payout ratio as distributions and dividends declared over distributable cash flow<sup>2</sup>. The objective of presenting this measure is to calculate the percentage of actual distributions in comparison to the amount available for distribution. Payout ratio does not have a standardized meaning prescribed by GAAP. The Fund's method of calculating the payout ratio may not be comparable to similar measures presented by other income trusts.
- 4 This release contains certain forward looking statements (the "Statements") regarding future growth potential, results of operations, performance and business prospects and opportunities of the Fund. These Statements reflect management's current beliefs and are based on information currently available to the management of Richards Packaging. A number of factors could cause actual events or results to differ materially from those discussed in the forward-looking statements. Factors that could cause such differences include, among other things, changes in customer and supplier relationships and the impact on order volumes and pricing, competition in the industry, inventory obsolescence, trade risks in respect to foreign suppliers and fluctuations in foreign exchange and interest rates. Although the Statements contained in this release are based upon what management believes to be reasonable assumptions, there can be no assurance that actual results will be consistent with these Statements. These Statements are made as of the date of this release and the Fund assumes no obligation to update or revise them to reflect new events or circumstances.
